

## **Herz Fig No 4218GF**

Flanged variable orifice double regulating valves from DN65 – DN300 shall be Cast Iron, to BS7350, Straight pattern, flanged to BS EN 1092-2 PN16 and have a non-rising spindle with an EPDM coated parabolic disc for positive shut off. Pre-setting shall be by limitation of spindle lift with pre-set value displayed on the hand wheel. Valves shall have locking and marking facilities for the pre-setting and be fitted with self sealing test points to allow measurement of pressure drop across the variable orifice to determine the flow rate. The valve manufacturer shall provide a five year fully comprehensive warranty, covering parts, labour and consequential loss.
