

## **Herz Fig No 4017M**

Screwed fixed integral orifice commissioning valves DN15 – DN50 shall be DZR Copper Alloy, oblique pattern and shall have an orifice integral to the valve body and be in accordance with BS7350, rated PN20. Valves will be fitted with self-sealing test points for flow verification and have a non-rising spindle with a double O-ring spindle seal. Pre-setting shall be by limitation of spindle lift with pre-set value displayed digitally through a window in the hand wheel. Valves shall have locking and marking facilities for the pre-setting. Valves must be sized for the flow rate required for each application, low and medium flow versions will be available. The valve manufacturer shall provide a five year fully comprehensive warranty, covering parts, labour and consequential loss.
