

Herz Fig No 7217 TS-V

The fixed orifice control valve should be available in sizes DN15 & DN20 with low & medium flow versions available, the valve body shall be constructed from DZR Copper alloy and be threaded to ISO 7-1 Rp, rated PN20.

The combined balancing and control valve shall have an orifice integral to the valve body and be fitted with self sealing test points for flow verification. The valve seat will have a 4mm lift with 3 full turns to the spindle for setting. An on/off or modulating actuator with a M28 x 1.5 mounting thread should be fitted to the valve to facilitate control. The valve manufacturer shall provide a five year fully comprehensive warranty, covering parts, labour and consequential loss.
